

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions and listings of claims in the application:

1. (Previously Presented) A grease composition for constant velocity joints comprising:

a lubricating base oil;

a thickener;

carbon black with a mean particle size of not greater than 500 nm;

an organic molybdenum compound; and

a complex of a fatty acid salt and a carbonate, wherein said fatty acid salt is overbased by said carbonate.

2. (Previously Presented) The grease composition for constant velocity joints according to claim 1, further comprising at least one from among sulfur-based extreme pressure agents, phosphorus-based extreme pressure agents and zinc-based extreme pressure agents.

3. (Previously Presented) The grease composition for constant velocity joints according to claim 1, further comprising an organic acid salt.

4. (New) A grease composition for constant velocity joints comprising:
a lubricating base oil;

a thickener;
carbon black with a mean particle size of not greater than 500 nm;
an organic molybdenum compound; and
a complex of a fatty acid salt and a carbonate, wherein said fatty acid salt is
overbased by said carbonate and wherein a mean particle size of said carbonate is at
least 50 nm.
